

I respectfully urge you to reject the NAB's petition 04-160. I am deeply disturbed that our First Amendment rights have been infringed on by blocking "the people" from watching network television on satellite tv and being forced to watch inferior local service if we want to watch the television networks. Now they want to block us from traffic and weather reports on satellite radio. I love my satellite radio. Finally, I have access to excellence and variety in programming including news, weather, sports, and traffic information. I live in a remote area and hope that you will not allow those greedy organizations to once again block our rights, especially since they don't offer a quality product themselves!
